# I'm Liliana Gonçalves

## Project Manager

Skilled at organizing and optimizing resource allocation, and implementing efficient workflows, with an ultimate goal to streamline operations, enhance productivity, and consistently deliver outstanding results. Passionate about leading and motivating teams to achieve production goals with efficiency and excellence.

## What Makes Me Happy

While studying product design, I realized that my true passion lays in the intricacies of the process and not so much the product itself or its conception. I thrive on optimizing a process/workflow, identifying workplace deficiencies and, squash them!

### Dynamic Work

Working on a moving/ growing project with challenges and opportunity to improve.

### Meaningful Work

Working on a project that will make a positive difference.

### Collaborative Working

I like working in goal focused teams. I believe it's the only of achieving greatness.

## Education

I have a bachelor's degree in "Product Design and Technology", which focuses mainly on product development, 3D CAD Design and project management.

### ESAN

Bachelor Degree In - Product Design And Technology

2015-2019

## Work History

### Main activities and responsibilities:
